

To whom it may concern:

To our understanding “Conflict Minerals” are defined as tin, tantalum, tungsten and gold that originated from the Democratic Republic of Congo (DRC) or an adjoining country (Angola, Burundi, Central African Republic, the Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda, and Zambia).

We can identify that none of the photopolymer resins we are supplying to you contain “conflict tin, tungsten, tantalum and/or gold”. Furthermore,

- Formlabs, Inc. can certify that its resin supply chain is free of conflict minerals.
- Formlabs, Inc. can certify that it does not knowingly or actively procure, source, purchase or otherwise acquire metals, components, or other products containing conflict materials.

Sincerely,

A handwritten signature in black ink that reads "Christopher M O'Brien". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.
